TRAIL RIDING POPULAR IN CANADA'S NATIONAL PARKS

Modern transportation facilities have brought many of Canada's national parks to within a few days' or hours' travel of large Canadian and American cities. Most people desire to get back to the simple life, to the sound of the brook, to the lake shore and the mountains. The call of the great outdoors is a yearly urge which permeates every office, mine, factory and workshop, and lingers through the night at every household window. There are many different ways in which this annual yearning for life in the open may be satisfied. Trail riding in Canada's national parks is which is the most popular. It is in 1924 the Trail Riders of the Canadian Rockies was formed. It is a Canadian society with cosmopolitan membership. The 23rd annual gathering of this unique organization was held in July of this year at Windy Camp Country, at the junction of Panther and Wigmore Creeks, north of Banff, which is one of the best wildlife areas in the park. Creek, Harrison Lake, Panther River, the mountains and Deer Valley, and Cascade Mountain were feature attractions.

In this park there are nearly a thousand miles of well-kept trails leading to dazzling glaciers, green valleys, bright flowers, glistening brooks, rushing torrents, great dark forests, and lake waters reflecting white clouds and deep blue skies. The regions lying between the two parks, and accessible from either, is majestic in alpine interest. Lofly snow-capped mountain peaks, and glaciers which descend almost to the roadside and melt away in flowered bedded valleys, lend enchantment to the scene. Mountain sheep, which many people believe are shy, cross and recross one's trail. It is a veritable paradise for the amateur photographer and many a snapshot album is adorned with pictures of wildlife in this great natural museum.

In recent years Yoho and Kootenay National Parks in British Columbia have also become popular areas for this exciting and adventurous pastime. The ardent trail rider may prefer the longer rides, there are many interesting short rides for beginners. For them, a trip around the Bungalow Camps in Yoho National Park, starting from Yoho, Wapta, Lake O'Hara, or from Emerald Lake Chalet, would have a special appeal. For sheer beauty the Yoho Valley is unsurpassed. Takakkaw Falls, more than 1,500 feet in height, The Angel's Stairs, Laughing Falls, Yoho Glacier, or glacial mountains such as McArthur, Cathedral, Stephen and President, sometimes called "Guardians of the Valley," provide breath-taking scenes.

Lawe Wanderer, in Kootenay National Park, is a good centre in the Upper Columbia Valley for trail riding into the Selkirk or through the western passes of the Canadian Rockies. Riders on the Vermilion Range, upon climbing a ladder to a scaffold look-out platform perched forty feet above tree-trunk level, are able to observe moose, elk and other deer coming down to drink at a mountain spring. The Kootenay River affords good fishing to the rider who did not forget his rod.

Here lies the realization of what may have been mentally pictured as the perfect vacation. The simple charm of trail riding is the sense it gives of intimacy with nature. It is a pleasant, healthful recreation recommended by doctors and extolled by poets, painters and philosophers.

A man observed by sin has no males resistance to observation.

Nobody looks up to the man who looks down on others.

GOLF NEWS

Sunday, August 25 the second round of Charbonnier Cup was completed. Top honors going to Don Rees with a low gross of 80 and Gordon Hutton low net 74. The cup being held by Gordon Hutton for the season 1946.

The past week witnessed completion of the cairn to commemorate HMCS Blairmore, erected in an imposing place on the boulevard, fringing the park and east of the bandstand. The plaque has been received and will be put in place, and an iron frame surmounts the cairn to accommodate the ship's bell. Later an unswelling ceremony will be held when arrangements are completed.

BELLEVUE FLOWER SHOW MONDAY

On Monday next, Labor Day, the Bellevue and District Horticultural and Industrial Society will stage their 29th annual exhibition of flowers, vegetables, domestic science, school art, etc.

This exhibition, displayed annually in Bellevue skating arena, has been growing steadily year by year and lovers of flowers and art make it a point each year to visit the exhibition and see what the district can produce. Entries are received from Lundbreck to Coleman and are in the neighborhood of 1,000, and prize money \$600 in value. The exhibition opens at 1 p.m.

Judges are expected to be Mr. Coyne, of the experimental farm, Lethbridge; vegetables; Mr. George Climo, of Calgary, flowers; and Miss Muriel Maloney, of Macleod, ladies' needlework and culinary.

In addition to the exhibition a program of children's sports will start at 10 a.m., and there will be tricycle races on main street. An auction of prize-winning flowers and vegetables will be held in the arena at the close of the show around 7 p.m. A grand dance in the Oddfellows' hall at night, with Ed's orchestra supplying the music, will conclude the day's festivities.

Following is a list of donors of special prizes, as well as the major awards:

1. First Prize, value \$6.00, donated by F. M. Thompson Co., Blairmore.
2. Second Prize, value \$5.00, donated by Bellevue Pharmacy.
3. Third Prize, value \$3.00, donated by Kerr Bros., Bellevue.
4. First Prize, donated by R. Simpson & Co., Regina.
5. Second Prize, value \$5.00, donated by Blairmore Hardware.
6. Third Prize, value \$2.00, donated by Kerr Bros., Bellevue.
7. First Prize, \$2.00 value, donated by Zak Meat Market, Bellevue.
8. First Prize, \$2.00 value, donated by Burns & Co., Calgary.
9. First Prize, \$5.00 value, donated by W. Evans, Blairmore.
10. First Prize, \$2.00 value, donated by G. Coupland, Bellevue.
11. First Prize, \$2.50 value, donated by Houty's Store, Maple Leaf.
12. First Prize, \$2.00 value, donated by Mr. G. Climo, Calgary.
13. First Prize, \$2.00 value, donated by G. Coupland, Bellevue.
14. First Prize, \$2.00 value, donated by J. Curry, Bellevue.
15. First Prize, \$4 lbs Coffee, donated by Horne & Pittfield, Lethbridge.
16. First Prize, \$4 lbs Coffee, donated by Horne & Pittfield, Lethbridge.
17. First Prize, \$5.00 value, donated by Bellevue Pharmacy.
18. First Prize, \$2.00 value, donated by J. Radford, Bellevue.
19. First Prize, \$2.00 value, donated by Johnson & Cousens, Bellevue.
20. First Prize, \$2.00 value, donated by Kerr Bros., Bellevue.
21. First Prize, \$2.00 value, donated by G. Coupland, Bellevue.
22. First Prize, \$2.00 value, donated by Johnson & Cousens, Bellevue.
23. First Prize, \$2.00 value, donated by Paton's Bakery Service, Bellevue.
24. First Prize, \$2.00 value, donated by Johnson & Cousens, Bellevue.

100. First Prize, \$2.00 value, donated by Johnson & Cousens, Bellevue.

KRYWOLT-KUBIK

A very pretty wedding took place at St. Anne's Catholic church, Blairmore, on Tuesday morning, August 26, when Margaret, youngest daughter of Mr. and Mrs. J. Kubik of Blairmore, was united in marriage to Mr. Alois Krywolt of Coleman, Rev. Father M. A. Harrington officiated.

Given in marriage by her father, the bride was adorned in a floor-length veil held in place by a bouquet of pink roses and carnations. Miss Anna Kubik, sister of the bride, acted as bridesmaid and was attired in a gown of pink sheer with chapel veil and carried a bouquet of gladioli.

Mr. John Nincan attended the groom while Mary Kanik, of Blairmore, and Helen Morris, of Coleman, acted as flower girls. They were dressed in white. The reception was held in the home of the bride's parents. About fifty invited guests attended.

Upon returning from their honeymoon at the coast, the happy couple will reside in Coleman where the groom is employed.

CAN YOU SEE?

That's good and we hope that you will never have to use your finger tips for eyes.

A donation to the Canadian National Institute for the Blind will be made in the name of persons without sight to be self-supporting.

Please ask your elevator agent to deduct a generous donation from your grain ticket.

Donations to the Institute are an allowable expense from income for tax purposes resuming settlement of the dispute.

Strike figures for the first five months of 1946 show 92 strikes, involving 61,866 workers and causing a time loss of 644,108 man-days.

For the same period in 1945 there were 83 strikes, with 23,628 workers involved and a time loss of 77,973 man-days.

The figures recorded for May of this year show 25 strikes, involving 47,300 workers with a time loss of 564,925 man-days as against 24 strikes in April 1946, with 6,907 workers involved and a time loss of 47,116 man-days.

At the end of May, 11 strikes were recorded as unattended.

A comparison between recent figures issued by the British labor ministry and those issued by the Dominion department of labor shows that while unemployment is on the increase in Britain it is diminishing in Canada.

During May, 1946, there were 3,466 more men and women out of work in Britain than there were during the previous month.

Over here in Canada, as at May 2nd, there was a drop of 24,000 unemployed since April 4th. During the same period there was an increase of 25,000 in the number of unfilled vacancies—more than double the gain registered in March.

The employment picture is also considerably brighter in the prairie region. According to Fred J. White, regional superintendent, unemployment insurance commission, there has been a steadily increasing demand for labor ever since the beginning of spring. During the five week period ending April 11, the total number of job opportunities for both men and women rose from 9,750 to 13,587. For a similar period ending May 16, the figures rose to 16,423, and as at June 13, the total had mounted to 18,227.

Another indication of the improved employment picture is reflected in the fact that during May there were fewer new applications for unemployment insurance benefit than there were during April. The total number of persons signing claims register during the last six days of May was 3,706 less than the number during the last six days in April.

The situation in respect to the employment of ex-service personnel is also improving with the number in receipt of out-of-work allowances gradually diminishing. During the month of May, 7,657 veterans were placed in employment. In the same period 1,958 ex-servicemen and 50 ex-servicewomen were reinstated in their pre-war jobs.

NEW RENTAL REGULATIONS FOR SHARED ACCOMMODATION OUTLINED BY PRICES BOARD

Effective August 15, landlords of shared accommodation may give a straight six months' notice to vacate terminating at any time the Wartime Prices and Trade Board has announced.

Previously, the six months' notice to vacate this type of accommodation could not end between September 30 and April 30.

The Board has also announced that a lease for commercial accommodation, as provided by Order 588, may contain a clause should the landlord and tenant agree, to the effect that it can be terminated by the tenant only at a time specified and agreed upon notice. Previously, the lease could not be terminated by either parties prior to the end of the five year term.

STRIKES AND LOCKOUTS IN CANADA: MAY, 1946

Time lost due to strikes and lockouts in Canada during the first five months of 1946 was greater by over 600,000 man-days, it was announced today by the Hon. Humphrey Mitchell, minister of labor.

Time lost during May, 1946, accounted for a part of this increase, being 82 percent of all time lost due to industrial strife during the first five months of this year. This was due mainly to the strike of 37,000 loggers and woodworkers in British Columbia, which began May 15, and is now terminated, working being resumed pending settlement of the dispute.

Strike figures for the first five months of 1946 show 92 strikes, involving 61,866 workers and causing a time loss of 644,108 man-days. For the same period in 1945 there were 83 strikes, with 23,628 workers involved and a time loss of 77,973 man-days.

The figures recorded for May of this year show 25 strikes, involving 47,300 workers with a time loss of 564,925 man-days as against 24 strikes in April 1946, with 6,907 workers involved and a time loss of 47,116 man-days.

At the end of May, 11 strikes were recorded as unattended.

A comparison between recent figures issued by the British labor ministry and those issued by the Dominion department of labor shows that while unemployment is on the increase in Britain it is diminishing in Canada.

During the month of May, 7,657 veterans were placed in employment. In the same period 1,958 ex-servicemen and 50 ex-servicewomen were reinstated in their pre-war jobs.

HILLCREST HAPPENINGS

Flight Lieutenant Victor Duke, who, since his return from overseas has been residing with his wife and family in Toronto, was a guest of his parents, Mr. and Mrs. E. O. Duke, on Sunday. Lieut. Duke left on Monday for a posting in Edmonton. He will be joined there by his wife and family.

Betty McNeil and Diane Loxen were patients in the Bellevue hospital last week, where each underwent a tonsilectomy.

Mary Leluk has returned from Nelson, BC, where she was visiting relatives.

Mr. and Mrs. Hollingshead and children of Edmonton, are visiting here with Mr. and Mrs. A. Hollingshead.

At a recent meeting of the United church board of trustees, plans were made for carrying on Sunday school work for the coming year. Johnny Brown consented to act as Sunday school superintendent.

Mr. and Mrs. E. O. Duke were business visitors in Pincher Creek on Friday last week.

Mr. and Mrs. D. J. Jones and Davie were Calgary visitors last week.

Funeral services for John Andreaschuk, who died last Tuesday morning after a sudden illness, were held from the family home on Sunday at 4:30 p.m. with Mr. H. Luk officiating. Interment followed in the Hillcrest cemetery.

Mrs. Doris and Betty McKinnon of Brockton, were visitors with their brother-in-law and sister, Mr. and Mrs. N. De Meyers. Mrs. De Meyers is spending a few days with her family in Brockton.

Miss Jean Moser was a week-end visitor with Mr. and Mrs. William Thomas at Fishburn.

COWLEY HAPPENINGS

The new well is now connected with the main pipe line which is furnishing the town of Cowley with an ample supply of water. The pressure is strong and now it would appear that our water trouble are solved for good and all time.

A general three-day rain of an inch and a quarter falling over this district the fore part of this week has held up the harvest here. Fall wheat is yielding more than an average crop. Fred Faminow and sons, have combined five hundred acres that made an average of forty-five bushels per acre. Peck Maloff has a small field that hit an average of fifty bushels per acre.

Mr. and Mrs. G. A. Neumann and sons; Kennedy, were visitors over Sunday, at the parental home of Mr. and Mrs. M. A. Murphy.

Miss Helen Morrison has returned from Vancouver, BC, where she paid a visit to her sister Marion and her brother and sister-in-law, Mr. and Mrs. Lloyd Morrison.

Miss Lucille Lemire, of Macleod, is visiting at the home of her uncle and aunt, Mr. and Mrs. Hector Lemire.

Mrs. Bougerolle, of Mr. Lehman, BC, is visiting at the homes of her sons, Henry and Albert and their families, in the Porcupine Hills.

Miss Patricia Kelly has returned to her home at Pine Lake following a lengthy visit at the home of her uncle and aunt, Mr. and Mrs. Cecil Elton here.

Ronald McNeil, of the Cowley airport, left on Thursday for a month's holiday at his home in Atwater, Saskatchewan.

Mr. and Mrs. Horace Poulsen are receiving congratulations upon the birth of a son in St. Vincent's hospital, Pincher Creek, on August 20th. Mrs. Poulsen is a war bride from Holland.

TRY OUR SOCIETY PRINTING

The Quality Tea

ORANGE PEKOE
Canada's Foreign Trade

THE QUESTION OF INCREASING foreign trade is one of the most important matters with which Canada must deal in the post-war years. During the war, it was demonstrated that we have here the necessary requisites for great industrial development. When there was urgent need for war materials, Canadian industry was able to expand greatly to help meet these needs, and this expansion brought about a general speeding up of activity in many of the primary industries, in transportation services, and other factors associated with industrial production. During the war, when labour and material were often in short supply, this expansion was frequently beset with difficulties, but in time of peace, such a development would be of benefit to the entire country.

Faced With
A Challenge

Canada's Minister of Trade, Mr. MacKinnon, has drawn attention to the fact that we are now faced with a challenge to seek new markets in addition to those in the United States and Great Britain, which have been for many years the traditional outlets for Canadian goods. The Trade Minister, in a recent address before the Canadian Junior Chamber of Commerce at Edmonton, expressed the view that we can look to Latin America for great expansion in trade. It is apparent that there is a keen interest in those countries in developing trade with Canada and that there is a very large market there for many Canadian products. Mr. MacKinnon and other authorities have also urged that more attention be directed to markets for Canadian goods in the Orient. Japan, once a great exporting nation is not now a competitor for trade in the Pacific, and there should be many opportunities open there.

More Trade
With India

Records show that in 1939 exports to Australia, New Zealand, China, India and Japan formed less than ten per cent of Canada's total export trade. During the war, trade with India increased, and there are encouraging possibilities for it to be further built up, since the resources of the two countries are not competitive. There is also a great potential market for Canadian goods in China. It is apparent that competition for business in the post-war world is keen, but Canada has much to gain by making every effort to secure profitable outlets for her products. In the words of Mr. MacKinnon, "if Canada cannot find markets for her goods at satisfactory prices, we will at once feel the sad consequences here." Developments respecting foreign trade should be watched with interest for they may have a profound effect on Canada's future economy.

Would Train Nurses

Must Relieve The Present Shortage Across Canada

TORONTO.—The Canadian Nurses Association at the closing session of its convention recommended that immediate steps be taken to train nurses aides to work in hospitals with a view to alleviating of the present acute shortage of nurses across Canada.

The association urged that representative committees be formed for the purpose of studying the problem. Included would be representatives of the nursing and medical professions, hospital administration and hospital associations, and provincial government departments.

The committee would make an analysis of the functions and responsibilities of the professional nurse in order that her energies "may be directed to those duties, and that duties not requiring the services of a professional nurse be directed to other workers."

Because the educational requirements for admission to schools of nursing in Canada vary in the different provinces, and the requirements of some schools do not meet university matriculation standards, the assembly urged that educational credentials of applicants be appraised by an authoritative educational body.

SOVIET LIBRARIES

The Soviet Union has 80,000 public libraries in cities and countryside. Of these, 1,561 are in Moscow, including the great Lenin library, leading library of the country, with its collection of 10 million books.

WOULD LEAVE REICH

FRANKFURT, Germany. — An "unconscious desire" by millions of Germans to emigrate from the occupied Reich has been reported by the United States army's intelligence division.

A healthy youngster walks and runs about 15 miles a day.

Price Control
And Rationing
Information

Q.—Will ration books issued to new-born babies contain coupons to cover sugar for canning?

A.—If you apply for a ration book on or before October 31st, the book will contain this year's allotment of sugar-preserves coupons for canning sugar.

Q.—Are ex-servicemen given a priority suit purchase certificate? I was told the other day that these priority certificates for suits are no longer issued to ex-servicemen.

A.—All ex-servicemen receive priority suit certificates when they are discharged. After October 30, 1946, these certificates will not be issued. However, retailers and merchant tailors will be required to honour the certificates which have been issued until December 31, 1946.

Q.—When do the ration book coupons become due in ration book six?

A.—Two meat, 2 butter and 3 sugar coupons become due on September 19 and 26, these coupons to be removed from the new ration book No. 6. Anyone not obtaining their ration book at the distributing centre during the regular days set aside for the distribution of ration book six, will have to wait until after September 29 for their book, and will, therefore, find themselves unable to use the above ration coupons on the days they become due.

Q.—I am a barber in a small village. May I raise my prices for barbering and hairdressing to meet the higher cost of living?

A.—Barbering and hairdressing are under the price ceiling. You may not raise your prices unless you obtain special permission from the Wartime Prices and Trade Board.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

A MOTOR TRIP

Four Manitoba Residents Travel To Ontario To A Jeep

Travelling 1,500 miles in a jeep is not exactly the most comfortable mode of transportation, but it is a way of getting to your destination and seeing more of the world in the same time. Four residents of Manitoba did that, when they travelled from Oxygonville, about 180 miles north of Winnipeg, to St. Catharines in a farm jeep.

The four, Mr. and Mrs. Harold Hunter and Mr. and Mrs. Algy Freeman, came down to attend a funeral. They had planned to go by rail, but missed the train, and struck upon the brilliant idea of making the journey in a jeep. Leaving Oxygonville on Wednesday afternoon, the quartet and their jeep arrived on Saturday morning, none the worse for their long trip.

On the contrary, the journey was rather delightful, with many interesting sights encountered on the way. No trouble was experienced, but they did run out of gas north of North Bay. In all, it was a most interesting journey.—St. Catharines Standard.

KING'S PICTURES

LONDON.—The most important pictures from the King's collection will be shown next winter at Burlington House by the Royal Academy, and will include nearly 500 works.

Field Marshal Montgomery, Chief of the Imperial General Staff, has chosen a conventional shield for his coat of arms, but the supporters reflect his unorthodoxy. One is a crusader—reminiscent of the crusader's badge worn by his famed 8th Army—and the other is a British Tommy in battle dress, wearing a black beret of the type favored by the Field Marshal.

The shield proper shows two lions and a lioness and is surmounted by a helmet and broken spear, features for centuries in the arms of Montgomery families. The motto, also shared with the other Montgomerys, reads: "Gardez Bien" (Guard Well).

COAST-TO-COAST

KELOGG'S ARE CANADA'S

**choice
for
any meal
anytime!**

Want an idea that will help you save time and work—and at the same time keep meals more interesting for your family? Thousands feature Kellogg's not only for breakfast, but for quick snacks anytime of day! Kellogg's Bran Flakes, All-Bran, Rice-Krispies, Bran-Flakes, Krumbles and All-Wheat are all made by Kellogg's, the greatest name in cereals!

Pep Bran Flakes with other parts of Canadian whole wheat are delicious, extra crisp, extra thick. Your whole family will enjoy Kellogg's Pep.

SAVE TIME... SAVE FUEL... SAVE FOOD!

Made Some Changes

But Viscount Montgomery's Coat of Arms is Conventional Shield

Field Marshal Montgomery, Chief of the Imperial General Staff, has chosen a conventional shield for his coat of arms, but the supporters reflect his unorthodoxy. One is a crusader—reminiscent of the crusader's badge worn by his famed 8th Army—and the other is a British Tommy in battle dress, wearing a black beret of the type favored by the Field Marshal.

The shield proper shows two lions and a lioness and is surmounted by a helmet and broken spear, features for centuries in the arms of Montgomery families. The motto, also shared with the other Montgomerys, reads: "Gardez Bien" (Guard Well).

Established Service

Blood Donation Scheme Has Proved Valuable To British Hospitals

In a review of Britain's blood donation scheme last year the British Ministry of Health states that about four thousand bottles of dried plasma were sent to Holland after the liberation for the medical treatment of people suffering from the effects of starvation. This was in addition to many thousands of bottles of whole blood plasma sent to the British fighting services and used in civilian hospitals in Britain, where transfusion is being used more widely than ever before, especially for surgical and maternity cases. The total number of blood donations in England and Wales last year was nearly 394,000. Before the war, blood transfusion was the concern of a few voluntary associations and one or two local authorities. Now a service designed to meet the needs of wartime casualties has become an established and valuable part of the general hospital services of Britain.—Fort William Times-Journal.

Origin Of Ice Cream

Production Was Started First In Italy In Year 1900

Very little of the history of ice cream has been recorded but its production is said to have originated in Italy as long ago as 1600. Water lilies were probably brought to France from that country about 1550 but ice cream itself evidently was not used in Paris until 1775. It appeared in England and Germany about the year 1786 and was advertised in New York in 1786 for the first time. Ice cream was introduced in Washington at a dinner in honor of President Jackson.—Kitchener Record.

GEMS OF THOUGHT

INDIVIDUAL EFFORT

The best way to get to the top is by being the best man at the bottom.—V. H. Jones

Merit exists without high position, but no one can reach high position without some merit.

In a musician made by his teacher? He makes himself a musician by practicing what he was taught.—Mary Baker Eddy.

Your circumstances may be unconventional, but they shall not long remain so if you but perceive an ideal and strive to reach it! You cannot travel within and stand still without.—James Lane Allen.

Straight from the Mighty Bow this truth is driven: They fail, and they alone, who have not striven.

—Clarence Unruh

The race advances only by the extra achievements of the individual. You are the individual.—Towne.

A psychiatrist says that everyone will be insane by the year 2159. If present conditions of living continue, this estimate may be altogether too liberal.

Drive out ACES

SMILE AWHILE

First Pickpocket: "What are you reading that fashion book for?"

Second Pickpocket: "Well, we've got to know where all the pockets are, haven't we?"

Porter: "Shall I brush you off, sir?"

Passenger: "Never mind, I'll sniff off like the rest of the passengers."

"I hope to get on, sir, I'm taking a correspondence course to learn how to make more money, sir." "H'm Well, it's just too bad for you, Jones. I'm also taking one to learn how to reduce expenses."

Teacher: "Robert, give me a sentence which includes the word 'fascinate'."

Robert (after deep thought): "My father was fascinated with 10 buttons on, but he can only fasten eight."

Client: "Do you think you can make a good portrait of my wife?"

Artist: "My friend, I can make it as lifelike that you'll jump every time you see it."

Sergeant: "Did you sleep well on your trip? I'm afraid it was a little hard and uneven but—"

Conscript: "It was all right, sir. I got up now and then during the night and rested a little, you know."

"I understand married men make the best commercial travelers."

"That's right. Probably because they're so used to taking orders."

Young Bill: Look at your old worn boots and your father a shoemaker. You ought to be ashamed of them.

Young Phil: That's nothing. Your baby brother's got only one tooth and your father's a dentist.

The old-fashioned farmer was hard on convicts. "No," declared he. "I'll have no such contraptions in my house. Planners are bad things."

"Oh, but father," protested his daughter, "this is an upright piano."

A business man called at a friend's office. After a glance round he asked, "How's your new boy getting along?"

"Fine," he's got everything so mixed up that I can't get along without him."

A Kentucky judge met an old Negro manning of his acquaintance. "Good morning, Aunt Semma," he said, pleasantly. "Where are you going?"

"Laws, Judge," was her reply. "I've been whah I've goin'."

Flights To Moon

Interplanetary Travel Claimed To Be A Possibility

The United States Navy said it's only a hop, skip and a jump until persons will be able to fly to the moon.

The first the Navy has to perfect is jet-propelled, pilotless aircraft. From this research the Navy will learn a lot about the interplanetary system.

"Then, a little farther in the future, are satellite vehicles, circling the earth hundreds of miles up, like moonbeams," a Navy statement said. "Interplanetary travel, in case someone feels the urge to visit far places, is only a short step from the satellite vehicle."

The forecast is contained in a review of the Navy's guided missile program. One of the weapons of this type under development is a pilotless aircraft that is sent into the air to "sniff out" its own enemy target. When it "smells" an enemy plane or ship it drives on it, exploding as it strikes.

This weapon has its water twin. A missile that will "dive deep and speed unerringly to a fast manoeuvring target" is being worked out. It also can be fired against shore installations from a submerged submarine.

A Man To Remember

Australian Doctor Unknown Outside His District Is Being Honored

An Australian doctor, who was practically unknown outside his own district, has achieved fame after death. Residents of Payneham, a suburb of Adelaide, are planning a \$9,720 children's centre as a memorial to Dr. E. L. Northwick for his 46 years of self-sacrifice for the community.

Examples of his deeds for the needy were: He never charged a poor patient. He thanked a patient for getting better after he had performed, free of charge, an operation that saved the patient's life. He had an understanding with a druggist that prescriptions marked "ad meum" (to my account) were to be provided free for patients. He instructed the local butcher to send meat daily to poor patients who needed food rather than medicine. He sent loads of firewood to the needy during the winter. For 26 years he attended, free of charge, a man suffering from an incurable ailment. Dr. Northwick was 75 when he died and to the last he struggled to attend people who were not as ill as he was.—Niagara Falls Review.

WOULD LEAVE REICH

FRANKFURT, Germany. — An "unconscious desire" by millions of Germans to emigrate from the occupied Reich has been reported by the United States army's intelligence division.

A healthy youngster walks and runs about 15 miles a day.

Defies Discovery

Location Of Legendary Silver Mine In Ontario Is Mystery

A silver mine of fabulous wealth is located in a cave somewhere in the Mazinaw Lake district east of Peterborough, Ontario, according to local legend. Location of the mine, it is believed, is known only to a few Indians in the district.

The legend says that many years ago a man named Meyers came to the wild area around Mazinaw Lake for his health and there became friendly with the Indians and finally was shown the cave.

The tale told by Meyers was that the silver was found in the cave in formations hanging from the ceiling. Two other white men were supposed to have been present with Meyers and the limited ground area at the monument caused him to land on the building.

NOT MODERN DISCOVERY

The Masai, natives of Central Africa, knew that malaria is carried by mosquitoes long before modern medicine discovered the fact. Their word for malaria, translated literally, means "I have been bitten by a mosquito."

Will Demand Free Elections For Poland

LONDON.—The foreign office said that the British government was prepared to apply economic sanctions to Poland if the Warsaw regime failed to carry out the Potsdam agreement for free and unfettered elections in that country this fall.

A foreign office spokesman said Britain would refuse to return Poland's gold reserves, brought here by the wartime exiled government, if election provisions sketched in Anglo-American notes to Warsaw were not observed.

"The first and most obvious sanction, in the event the grave irregularities of the recent referendum also take place during the promised election, would be for us to refuse to ratify the recent economic agreement providing for the return of the Polish gold reserve after deduction of the expenses of the exile government while in London," the spokesman said.

The joint notes from the United States and Great Britain accused the Polish government of ignoring the agreement for free elections in Poland, and charged that grave irregularities occurred in the Polish referendum last month.

World Shortage Of Bread Is Expected Soon

GENEVA PARK.—A possible world shortage of 8,000,000 metric tons of bread cereals for the winter of 1946-47 was foreseen in an address here by George R. Paterson, Canadian member of the international emergency food council's central committee.

Mr. Paterson, counsellor on agricultural affairs to the Canadian embassy in Washington, D.C., told the Canadian Institute of Public Affairs that even if this shortage does not occur, requirements to bring many people to pre-war dietary levels will not be fulfilled.

Solution of the problem was not only to provide enough food to meet the shortages but to cope with the factors which bring grain shortages in many heavily populated areas and to make it possible for people in starvation areas to buy from the world's available supplies.

Mr. Paterson estimated the deficit areas would require, in the 1946-47 season, 30,000,000 metric tons of bread grains.

"This vast amount, even if it could be made available and financed, would still leave unsatisfied the requirements needed to return many people to the pre-war dietary level," he said.

"The requirements of other important food items will also continue to remain incapable of fulfillment during this period—meats, oils, fats, sugar and dairy products."

TWO-WAY TRADE

Dalglish Line Hopes For Operation On Hudson Bay

NEWCASTLE ON TYNE, Northumberland, England.—Dalglish line spokesmen said they hoped to resume two-way operation next year on the Hudson Bay route between Churchill, Man., and England.

Service would be provided by freighters carrying ordinary cargoes for the Dalglish line, a leading bay operator before the war.

One Dalglish ship was among seven visiting Churchill this year with a special mission evacuating wheat stored in the government elevator during the war when commercial shipping on the bay virtually was at standstill.

The Dalglish ship carried some cargo for western Canada but others are understood to have travelled empty to obtain wheat needed in the United Kingdom. Possibility of future cargoes has been discussed by the shipping company with prairie governments.

TO FIX PRICES

A Committee Of The International Wheat Council Starts Work On Draft

WASHINGTON.—A preparatory committee of the 13-power international wheat council is beginning work on revision of the draft convention leading to a multilateral agreement fixing the maximum and minimum price of wheat, the council announced after a preliminary meeting.

Canada was represented by Charles F. Wilson, of the trade and commerce department. This council of so-called nuclear exporting and importing countries hopes to prepare a draft for submission to a world wheat conference to be called by the United States, possibly in October.

The foundation of Canadian journalism was laid in 1752 with the establishment of the Halifax Gazette.

TO APPOINT BOARD

British Government Is Arranging For Control Of Steel Industry

LONDON.—The government announced it has decided to appoint a board "for the general control and supervision of the iron and steel industry."

The announcement said the board would include members of the privately-owned steel concerns, but declined to disclose previously announced plans for eventual public ownership of the mills.

The board will be responsible to the minister of supply, John Wilmot, who last April announced in the house of commons that the government had decided to extend a "large measure of control" over the iron and steel industry.

Nationalization of the industry was one of the Labor party's campaign-announced goals.

ADVERSE WEATHER

Recent Storms In Britain Have Seriously Delayed Harvest Work

LONDON.—British farmers, four times as many tractors as in 1939 and with thousands of combines, have been forced to use hay in harvesting—heavy—1946 crops of wheat, barley and oats battered to the ground by storms in many districts.

Agriculture department spokesmen said it appears that recent rain, wind and hail have not so much destroyed vital crops as caused a delay of some weeks in harvesting, thus aggravating the serious labor problem. If farmers could have three weeks of sunny weather and a number of volunteer workers—plus the regular farm workers, land girls and prisoners of war—they still could harvest a good crop in a year of urgent need.

HARD ON BRITAIN

Coal Shortage Means Shivery Winter And Much Unemployment

LONDON.—Mass unemployment in Britain this winter is threatened by a 5,000,000-ton coal shortage.

That big a deficit will put 1,000,000 men and women out of work, Arthur Horner, South Wales miners' president, told a Rhondda valley meeting.

Fuel Minister Shinwell said in the house of commons that only higher individual output by the country's 700,000 miners can lessen the gap. It may be even wider unless expected savings in industry materialize.

For British householders, this will be another shivery winter, the annual allocation for each family continuing at 2,400 pounds. The one bright spot is that there will be no cut.

RATIONING STAYS

MELBOURNE.—J. B. Cumming, Australian director of rationing, announced that rationing of meat, butter, sugar, tea, cotton and other clothing material will continue in 1947. Abandonment of food rationing, he said, would be a blow to Britain whose people, he said, are anxious to take all Australia can supply.

RADAR IS NEEDED

WASHINGTON.—The United States navy said that a weather reconnaissance cruise in Arctic waters has demonstrated the indispensability of radar to Arctic mariners in dog sled icebergs. The navy said it was not uncommon for as many as 30 "targets" to show up on the radar screen.

Britain Wants Sole Control Of Palestine

LONDON.—A British government informant said that Britain will ask the United Nations trusteeship council next month to appoint her sole trustee for Palestine.

The government has decided this step is necessary, the source said, because with the demise of the League of Nations the legal basis of Britain's mandatory rights no longer exist.

He said, however, that Britain would "certainly not" give up her mandate in the Holy Land and had never considered doing so.

Foreign Secretary Bevin told the United Nations assembly in January that Britain was awaiting the report of the Anglo-American inquiry committee on Palestine before deciding the future of the territory. The committee subsequently recommended that Palestine be placed under a trusteeship system and that arrangements be made to allow 100,000 Jews to migrate in the near future. Negotiations on implementation of the report have become stalled, however, in a plan for division of the country into four zones which President Truman refused to support.

The foreign office said Britain would begin a conference on Palestine with representatives of the Arab League countries early next month and hoped to complete the talks before the United Nations assembly meets Sept. 23.

A spokesman said Britain probably would present to the UN a draft of a trusteeship agreement between the United Kingdom and the Palestine Jews and Arabs, provided a settlement was reached at the talks in London.

The Colonial office said "discussions are still going on with the Jewish Agency" regarding an invitation for its representatives to attend the talks in London.

The Jewish Agency executive committee has concluded a three-week conference in Paris.

The wearing of false teeth was common among the Romans.

PARIS PEACE CONFERENCE SCENES—Summoned by Prime Minister Attlee, the British cabinet in special session is reported to have heard U.S. alternative proposals for Palestine. At the Paris conference, Mr. Attlee, centre, and Australia's Dr. Ewart, right, chat with Indian delegates.

H. G. WELLS

LONDON.—H. G. Wells, distinguished British novelist, scientist, historian and social critic, is dead. He had suffered for many years from diabetes, and recent complications drained his vitality. He would have been 80 on Sept. 21. At 15 a draper's apprentice, he became one of the most famous literary men of his age. A prolific writer, he turned out more than 70 novels and historical works, which have been translated into every major language of the world.

Mr. Wells married twice, first his cousin, Isabel Mary Wells, and later, after a divorce, after Catherine Robbins, one of his students, who died in 1927. There were two sons by his second marriage.

REPORT DENIED

Britain Has No Intention Of Training Forces In Canada

OTTAWA.—Defence Minister Abbott said in the commons he wished to dispel "once and for all" any reports that Britain had asked permission to train military forces in Canada and had been refused.

Rising to answer queries by Col. A. J. Brooks (P.C., Royal), the minister said there had never been any approach by Britain on the subject, "either formal or informal."

He said reports had been published recently on the question and some two weeks later the general in charge of British training had visited Ottawa "and definitely ruled out the possibility" of troops coming to Canada.

CANADA'S RECORD

Pre-War Food Production Has Been Almost Doubled

GENEVA PARK, Lake Couchiching, Ont.—Despite a draining off of 20 to 25 per cent. of Canada's farm labor force during the war years, the Dominion has delivered 140 per cent. of her pre-war food production—not far short of doubling the per capita output of our farmers, K. W. Taylor, deputy chairman and food co-ordinator of the prices board, said.

In an address prepared for delivery at the annual conference of the Canadian institute of public affairs, Mr. Taylor said "Canada probably came as close as any country, and closer than most, to achieving a total war effort."

Reviewing Canada's food program and policy, he termed "a remarkable achievement" the increase over pre-war production averages of wheat by 35 per cent., meat and eggs 60 per cent., cheese 40 per cent., concentrated milk products 120 per cent. and sugar beets 25 per cent.

"A similar story can be told of our other great food producing industry, the fisheries," he added.

Above all the measure of success Canada had achieved "has been the result of plain hard work, long hours winter and summer, hours of extra chores in the early dawn and in the evening—by 1,000,000 farmers and their wives from coast to coast."

The food program had been organized carefully right down to the individual farmer, who had not been subject to compulsory direction of farm production, "but the program is implemented by education and persuasion supported by fair and reasonable price or other financial incentives."

FELT IN CANADA

Trouble In Middle East Raises War Risk On Shipments

VANCOUVER.—Repercussions of strife in the middle east are being felt in the ports lining the Pacific coast of Canada and the United States.

War risk on cargo from these ports to Palestine has been increased to 31½ cents per \$100 cargo value. The former rate was 20 cents.

Strike and riot risk rates have increased from ¼ to ½ per cent. Rates to other countries, which, during war years fell within the same range, remain unchanged.

May Establish Army Base At Churchill

CHURCHILL, Man.—The huge United States army and air base erected here during the war may become a permanent Canadian army base. This was the information gleaned during a visit to the camp. The Canadian army will carry out a more extensive Muskox expedition next winter and will likely be joined by a force of American soldiers in these operations.

At the present time 100 Canadian soldiers are camped in the almost deserted American huts. No Americans are now here. The Canadian army men are carrying out tests with summer vehicles and one officer told tourists on the annual Churchill excursion, that some of the vehicles were of the secret type.

A huge tank seemed to be the centre of the most interest. The vehicles under test included an amphibious duck which was used to transport the tourists across the harbor to old Fort Prince of Wales.

To the 200 or more American tourists the big camp was a great surprise. Few had ever heard of it and there was great wonderment as to why Uncle Sam had built such elaborate camp so far away from the American border. Fear of an invasion by Germany through the Hudson Bay was generally accepted by the tourists as the chief reason for the camp.

United States spent huge sums of money on the camp. It is located from three to four miles from the town and was erected on park rock and part muskeg land. Hundreds of tons of gravel were hauled in to level up the ground and the air strips built up at least 20 or more feet. The runways are of course hard surfaced. The military camp is about half a mile away from the hangars.

More than 3,000 American soldiers were stationed here but the airfield only had a small number of permanent airplanes based there. Much use was made, however, of the landing field by planes enroute to other bases in the far north.

The camp is electric lighted. A power plant with two dynamos, one developing 500 horsepower and the other 300, is still in operation. A big picture show which would seat over 500 is still intact but no use of it is being made by the Canadian soldiers. Water is also laid on and the men had hot and cold showers always available.

If Canada starts a permanent military camp here, they will of course make some use of the many buildings left by the Americans but they will not use them all. The camp after the Americans handed it over to Canada was in turn handed over to war assets but it is now in charge of the transport department. A staff of less than 30 is on hand to look after the buildings.

ESCAPES TYPHOON

TOKYO.—A typhoon which had been expected to deal southern Japan a harsh blow swept up Korea strait in diminishing force and veered toward the Sea of Japan. Crops were damaged, highways washed out and houses damaged along the western shore of Kyushu island, but no casualties were reported.

The famed Swedish botanist Linnaeus built a flower clock that told time by opening and closing of the flowers.

TROOPS TURN HAIFA INTO ARMED CAMP—Palestine's port of Haifa is a "frontline" area as British troops dig trenches, placed barbed wire and sand-bagged pillboxes as it was sealed off from the rest of the world. During a recent intensive search for arms, troops questioned Jewish girls.

As a crisis approached in the Holy Land over the Jewish immigration problem, two more immigrant ships from Europe arrived at Haifa, where some 2,500 refugees living on ships wait to land. Some of the refugees are seen on their ship.

CANADIAN RED CROSS SOCIETY

There are 2,449 service branches throughout Canada with a total senior membership of 2,124,159. Junior branches on record are 30,861 with a membership of 867,277.

Thus there are 33,260 branches of the Red Cross in Canada with a total membership of 3,000,466. This is the largest membership in the history of the Society and represents one in every four persons throughout Canada. If this great force can be kept in action, no peace program will be too difficult for the Canadian Red Cross in the days ahead.

The number of articles made during the war and up to December 31, 1945, reached the magnificent total of 50,661,634.

Junior Red Cross with 30,861 branches, slightly over 800 more than at the corresponding time last year, has really never ceased to thrive and grow since its inception in 1921. This great youth organization in Canada is a force to be fostered in the best interests of the future of the country. While not primarily a money-raising organization Junior Red Cross did raise \$192,886 for crippled children's work in 1945 and \$263,043 in the same period for war relief, without benefit of adult assistance.

FUNERAL SERVICES FOR LATE G. N. JACOBSON

Funeral services were conducted at Vancouver from the Chapel of Chimes, on August 19, for the late Oscar N. Jacobson, a former traveller in the Crows' Nest Pass.

Mr. Jacobson came to Fernie about 25 years ago travelling for Swift's on the Fernie-Cranbrook territory, later connected with BC Spruce at Lumberton. He was employed at the Globe hotel in Kimberley prior to his departure four years ago for Vanderhoof, where he operated the Vanderhoof hotel until June of this year when he was admitted to hospital at Vancouver, to pass away August 15th.

The late Mr. Jacobson took an active part and interest in sports, especially in Ensl Kootenay, where he leaves a host of friends.

The funeral, conducted by the Rev. W. McKay, was held under the auspices of the BPOE and Masonic lodges and burial was in the Masonic cemetery at Vancouver.

He is survived by his wife, Anna Jacobson; a daughter, Mrs. James McFarlane, of Kimberley, and one son, William, at Vanderhoof, three brothers and two grandchildren.

Deceased was well known locally, when he covered the territory for Galtors after BC Spruce ceased operation.

Teacher: "Now, boys, if we are good while on earth, when we die, we will go to a place of everlasting bliss. But, suppose we are bad, what will become of us?"

Tony: "We'll go to a place of everlasting blister."

NEARLY A MILLION WILL GO TO TOWN

With nearly a million people in Alberta go to town during the week of September 9-16, it will not be to the polling booths of a general election, nor to a circus or annual fair. They will be calling for their new ration book No. 6.

Over 800,000 new ration books will be issued in Alberta, approximately half of these in northern Alberta, the Wartime Prices and Trade Board announced.

Specific days during the week of September 9-16 are now being set aside by each ration board in the Alberta region for distribution of the book within their territories. Local papers will carry advertisements showing distribution points, and will tell what days these will be open. Local ration boards are cautioning all ration book holders to secure their new book during those specific days, as no further distribution will take place until after September 30. In the meantime the "latecomers," those who failed to get their books during the days set aside, will be without ration coupons during the intervening two weeks.

The services of volunteer workers are being enlisted by ration boards throughout the region to assist in the distribution of the new book. All ration book holders are being advised that they must bring their old ration books with them when applying for a new one. Likewise the green card marked RB191 in the old ration book is to be filled in by each holder and presented intact in the book when applying for the new book.

"All information on this card should be printed in pen and ink," a Prices Board official pointed out.

Columbus Club will journey to Lethbridge on Sunday, where they meet Galt Miners in the southern Alberta baseball playoffs. The Totems will have to come from behind, as they lost the first two games of the series here last Sunday.

BROOKS PHEASANTS BRING DISTRIBUTION IN PROVINCE

Pheasants raised in the Brooks game rearing farm, totalling 4,542, ranging from 5 to 10 weeks old, were released recently in many parts of the province, and 1,034 day-old chicks were sent to various groups for raising purposes. They will be turned into the fields in a few days.

Alberta's pheasant population will never become extinct if efforts of the Alberta Fish & Game Association and provincial government are continued along these lines.

The birds were expressed by truck, train and air to centres as far north as Peace River, and as far south as the Crows' Nest Pass. Very few casualties were reported in the shipping.

Wife: "Dear, I saw the sweetest little hat down town today."

Husband: "Put it on, let's see how you look in it."

SOCIAL SERVICE OUTLAY \$3,000,000 IN YEAR BY S.A.

Toronto—Actual outlay on social service operations in the Canadian Territory by The Salvation Army came to nearly \$3,000,000 last year, according to the 63rd annual balance sheet issued. The net receipts from the 1944 campaign applied to meet the gap between total costs and total income from operations were \$964,500.93, said Col. Tyndall.

Largest individual item in the outlay of funds received from the public, \$410,887.51, was expended as grants-in-aid toward maintenance of the 1944 campaign.

more than 300 centres for investigation and relief of problem cases, visitation of the sick and needy, and human reclamation work, all this being done by Salvation Army field officers.

Next largest amount, \$270,181.38, went to meet deficits on costs and maintenance of 38 social institutions including children's homes, emergency and rescue homes for girls, maternity hospitals, men's shelters and food depots, hostels

for homeless men, homes for aged men and women, relief of distress, police court and prison gate work, support of the League of Mercy which carries on hospital visitation and other welfare activities.

Third largest amount, \$139,862.83, went for rehabilitation work which covered assistance to civilians and service men and women, including temporary help with rent clothing, meals, travelling etc.

The sum of \$113,000 was applied

to Young People's work, training of Salvation Army officer candidates and allied activities.

The balance, \$30,569.31, was allocated to the support of Canadian officers serving outside of Canada.

In an effort to raise \$2,000,000 for maintenance and expansion of facilities next year, The Salvation Army 1946 campaign will be inaugurated across Canada on Sunday, September 15.

RATION BOOK 6

WILL BE ISSUED

BETWEEN

SEPTEMBER 9TH and SEPTEMBER 16TH

The green Application Card No. RB. 191 at the back of Ration Book No. 5 must be properly completed and presented to a Distributing Centre in order to get a new book.

Distributing centres will not be open on all days at all hours. Dates and hours will vary in each locality.

WATCH for OFFICIAL ANNOUNCEMENT IN THIS PAPER—NEXT WEEK

giving full particulars as to

HOW, WHEN OR WHERE TO GET YOUR NEW RATION BOOK

The first coupons in the new book will become valid September 19th. Failure to get your new book during the official week of distribution will involve delay and will mean that you will be temporarily without coupons when you may urgently need them.

WE WALK THE

Middle Road

We are a fortunate people. We walk the middle road.
Through our Government's wise measures of control, we have,
by resisting the temptation to rush after luxuries, been able to
enjoy them in moderation. We have, by keeping
necessities at the top of our buying lists, kept the
prices of both necessities and luxuries at the bottom.
Hardly another nation in the world today can point to so fine a record.

Yes, we are a fortunate people because we walk the middle road—
the road of moderation in all things—in our thinking,
in our actions and in our pleasures.

In the years of greater abundance, which are so surely
ahead, The House of Seagram believes that moderation, as always,
will continue to be a quality essential to the welfare of the
nation—and the individual.

WORLD HAPPENINGS
BRIEFLY TOLD

George Foster, 32, theatrical agent who gave Harry Lauder his start, died recently in London.

The Lincoln copy of Magna Carta has been installed in a one-ton safe fitted to a concrete block in Lincoln cathedral.

The South Wales and Monmouthshire Industries association will sponsor a big industrial show in London in August and September, 1947.

During the first six months of the year lifeboats in Britain were launched 268 times to help vessels and aircraft in distress and saved 381 lives.

Sir Evelyn Baring, high commissioner for Britain in South Africa, said the war office had asked for 10,000 natives for garrison duties in the Middle East.

Britain and United States will continue their wartime arrangements for the exchange of general economic information, the commerce department announced.

The south coast seaside resort of Bognor Regis, England, plans to abolish queuing for elderly people who live alone by providing voluntary helpers to shop for them.

Britain's newest battleship, the 42,000-ton Vanguard, has gone into dockyard hands at Portsmouth for an estimated six months' fitting out for next year's royal trip to South Africa.

A Free Port

No Port Must Be Subsidized Without Year Advance Warning

(By Jack Drayley, C.P. Staff Writer)
Just how that magic key to free commerce—the free port—applies to Canada's ocean gateways in these days of growing exports and a general disposition to knock down world trade barriers is not widely apparent.

But some ports—notably Quebec, Halifax and Saint John, N.B.—have gone on record as supporting the idea. Others, such as Montreal, Vancouver and Victoria have expressed a keen interest and, transport Minister Chervier announced in the Commons the other day that an inter-departmental committee headed by Emile St. Laurent, vice-chairman of the National Harbor Board, is studying briefs from several of the ports and will have a report for the next session of Parliament.

Meanwhile, Quebec has taken the lead in the agitation and is showering parliamentary questions on the boards throughout the country with doggers urging establishment of a free zone near the old city.

While not so vocal, Halifax and Saint John also have made bids, the two Maritime ports have introduced a rivalry into the free port coming out for year-round open ports—an argument which would rule out Quebec harbor, closed during winter months.

Gordon Innes, a member for Halifax, who has been following the question closely for two years, has emphasized this point. He said:

"If we are to have legislation on this matter it must apply to all ports of Canada. No port must be subsidized which cannot provide facilities for continuous year-round service. If certain ports were used as free ports and were not open all the year it might mean that goods would be landed in American ports and brought in bond to designated Canadian free port zones and this certainly would not be desirable with ice-free ports available."

A free port, in short, is an enclosure in a protected country in which the freedom from customs restrictions allowed is valid only as long as the goods concerned are in storage therein, or are moving into foreign and not into home markets.

Free ports now are in operation in New York and New Orleans in the United States where there are no comparable regulations to the Canadian bonded warehouse system which has been described as a "junior free port."

Probably the best example of the free port at its peak was Britain. In the days of free trade the whole island was a free port and the nation did an important business in trans-shipment and manufacturing for other countries.

APPREHEND JAPANESE
TOKYO.—Allied headquarters ordered the Japanese government to apprehend Japanese Nationals filtering into Hokkaido from Sakhalin and the Kurile Islands—Russian-occupied areas north of Japan. The public relations office explained that the apprehension was ordered "to guard against introduction of communicable diseases."

PROVED TAXABLE

Michael Faraday, who invented electric-magnetism, was asked by Gladstone of what use it would be. "Some day, Mr. Chancellor, you will be able to tax it," came the reply. Faraday predicted right, and the evidence is one item on every electric light bill, says the St. Catharines Standard. 287

MONTY MUST HAVE KNOWN SOMETHING—Battle or beta, "Monty" just couldn't lose. He won 55 from Maj.-Gen. Churchill C. Mann, C.B.E., D.S.O., Vice-Chief of Staff of the First Canadian Army in Western Europe, according to the current issue of *Mayfair Magazine*. Proof is the filing card reproduced above. Maj.-Gen. Mann's handwriting is as follows: "Brig. C. C. Mann bet 55 to 1 that the war with Germany will not finish before 1-9-45." The wager is acknowledged in the lower corner by the signatures of Brig. Mann, and Field Marshal Montgomery, and the date 22-10-44. At the left, centre, is the inscription "Received, thank you, B. L. Montgomery, Field Marshal. 6-5-45."

Soft Drinks

Large Increase In Consumption Shown In Recent Years

Canadians have taken to the pop bottle in a big way. By the end of the year it is estimated they will have consumed sufficient soft drinks to float an ocean liner about four times the size of the Queen Mary. Quoting government statistics, a leading Montreal beverage manufacturer claimed in an interview at Montreal that there was an increase of 56 per cent in the consumption of carbonated drinks in Canada between 1935 and 1941. "Because of the sugar rationing, the 1942 consumption dropped somewhat. Nevertheless, figures for that year show 58,273,974 gallons of pop valued at \$36,646,385 were sucked through straws by thirty Canadians—a volume almost four times the displacement of the Queen Mary."

To determine the fundamental reason for the increasing popularity of soft drinks, one must go back to the ancient days of European history when the first mineral spring became a meeting place for the ailing. As additional springs were discovered, hundreds of lavish health resorts, or spas, were established, many being famous to this day. In the United States some 10,000 such springs have been located. Several are known in Canada.

Fantastic claims regarding the curative qualities of their waters were made by spa promoters. Some guaranteed complete cures for ulcers, dysentery, gout and rheumatism. At other resorts it was claimed one could get rid of jaundice, neuralgia, diabetes, anaemia. Somewhere on the continent there was a special spa to cure every known disease.

In the eighteenth century chemists undertook to analyse mineral water. They discovered one of the sour liquids was merely a solution of ordinary water and carbon dioxide. In 1772 Joseph Priestley, famous British chemist and physicist, devised a method of making mineral water in his laboratory by aerating water with carbon dioxide by compression. Eighteen years later the manufacture of carbonated water was launched in Geneva, Switzerland. Soon it was being made in England.

In the United States, in 1807, Dr. Philip Physick induced a chemist to prepare a carbonated drink mixed with fruit juices as a medicine for some of his patients. This was the birth of the soft drink industry in North America. Soda fountains sprang up in numerous American cities and immediately proved popular. People still considered charged water in terms of medicine rather than refreshment, which is probably why soda fountains are found in most drug stores today.

The first soft drink bottle was cylindrical in shape with a rubber gasket at the top of the neck and a glass marble inside. When the vessel was filled with carbonated water the pressure of the gas from the inside forced the glass ball against the gasket and sealed the contents.

The original opener was a wooden plug with a die top. To open the bottle the plug was inserted in the neck and struck with the flat. The sudden escape of gas resulted in a distinct "pop," which is how the name of "pop bottle" originated. The present type of bottle cap, or "crown," as the trade knows it, came into use in 1880.

COMING TO CANADA

LONDON.—The first of 4,000 Polish army veterans who are going to Canada as agricultural workers are expected to reach the Dominion in mid-September. It has been learned. The Poles will be taken from Italy direct to Canada under two-year agricultural contracts.

KILLED MANY WORKERS

Phosphorus, once the principal ingredient of match heads, killed and maimed workers in the industry by causing necrosis of the easily diseased, until a non-poisonous match was invented.

Goat Story

Animal From The Zoo Jumps Into A Lion's Den

Apparently exhilarated by the warm, unseasonable winter weather on the Transvaal highveld, one of the mountain goats at the Johannesburg Zoo recently leaped over the wall of the goat enclosure with a great running jump and landed—in the lion enclosure.

Recovering from his first surprise, Satan, a magnificent specimen of maneless lion, began to stalk the goat. But Satan, like others in captivity at Johannesburg, had long been fed on meat which he didn't have to hunt. He had lost much of his native cunning and agility.

The goat was too quick for Satan, and keepers quickly arrived to see that the chase did not continue too long.

The keeper of the lions shouted, "Get inside, Satan, and humbly the king of beasts abdicated and entered his cage."

The unwary goat, dashing about in panic, fell from the perpendicular rock face separating the lions from the public. Injured, the goat was carried back to his own quarters, while Satan, allowed out again from his cave, lashed his tail in chagrin.

SYMBOL OF LIBERTY

MARGATE, Kent, England.—Margate City Council received from a citizen a request that it launch a national campaign to erect a giant statue of Winston Churchill on the white cliffs of Dover as a symbol of British liberty. H. A. Marsh proposed that the statue show Churchill holding his famous cigar, the tip of which would be "illuminated day and night for all time, to be seen by ships in the Channel."

ASTRONOMER RETIRES

OTTAWA.—R. Meldrum Stewart, director of the Dominion Observatory here who holds the title of Dominion astronomer, retired after 44 years in government service. He was appointed to the position in 1924.

HEALTH EDUCATION

There is no field in which the question of national unity is more important than in the field of health," writes Dr. Gordon Bates in an editorial entitled "National Unity" in Health, official magazine of the Health League of Canada. Dr. Bates is General Director of the Health League and editor of the magazine.

"Canada is growing up. But Canada like all countries will only acquire full membership, assured status and finally leadership in the federation of the world by virtue of the physical and mental health of all Canadians."

"It is not sufficient that one or several sections of Canada should have low rates of sickness and poverty, that the citizens of only some areas should be well fed, well housed, healthy and long lived. It must be a matter of concern to all Canadians that some parts of Canada have lagged behind others. The great objective should be steadily advancing standards in all parts of the Dominion."

"This objective requires a continuous health education program for the whole of Canada conceived along the broadest lines involving the participation of as many units of all varieties as possible. Only by such means will official departments concerned with the health and welfare of the people be strengthened, only by such nation-wide effort will laws for the preservation of health and the abolition of poverty be passed in all provinces except only in some."

"A single apple will affect a barrel of good apples. Communicable disease will spread from a neglected area to a healthy area or the criminal in the slum may rob and kill his wealthy neighbor. The objectives of humanitarianism are not parochial but national and worldwide. And as the objective of universal humanitarianism are realized there will be no slums or disease anywhere to infect the rest of the world."

Carrier Pigeon

Has Been Away Through No Fault Of Its Own

Carrier pigeon No. 656, like Pig No. 311 of the atomic-bomb explosion at Bikini Island, has been A. W. L. but through no fault of his own. No. 656 was a casualty. Apparently freed on a flight the bird was somehow injured and was found on the shores of the Ottawa river near the canal locks.

Believed to belong to the armed services, the carrier pigeon, which has a red rubber band on his left leg for carrying messages, was seen by three young Ottawa youths trying to fly near the river bank. The youngsters, Norman St. Germain, 310 Gladstone avenue; Michael Malone, 384 Frank street, and Gilbert Davis, 437 Kent street, brought the bird into the Evening Citizen office, and later took it to the Ottawa Humane Society.

The bird carried a 1946 band on the left leg with the number 656. Until the bird is taken back to its loft it is still classed, according to service procedure, as "Absent Without Leave."—Ottawa Citizen.

BORSTAL PLAN

VICTORIA.—Arrangements for the re-establishment of the Borstal system of rehabilitation of young delinquents in British Columbia will go ahead immediately without waiting for another session of the legislature, provided there are no physical obstacles in the way, Attorney-General Gordon S. Wiener said here. Re-opening of the institution that functioned in Vancouver from 1937 to 1942 hinges mainly on available accommodation.

LESS JUVENILE CRIME

Juvenile delinquency, which reached an all-time high in 1942, is on the wane, with the number of juvenile crime convictions in 1945 the lowest since 1940, the Dominion Bureau of Statistics reported. Juveniles brought before the courts in Canada in 1945 numbered 9,755, compared with 11,554 in 1944.

Unmanned Planes

Following Description Gives Idea Of How Drones Are Operated

The recent historic flight to two unmanned B-17 Drones from Hilo, Hawaii, to Muroc air base, Calif., was termed the forerunner of accurate, long range-guided missiles armed with atomic warheads.

Brig.-Gen. William L. Richardson, chief of the United States Army Air Force guided missiles division, said the unprecedented radio-piloted flight proved the air force could have struck a target at 2,500 or more miles range with any conventional bomber—unmanned.

How is a pilot drone operated? By automatic pilot and by electronics (radio, or radio if you prefer) from a mother airplane flying as close as 200 feet at extreme radar "vision," at present a theoretical 100 miles.

Special radar panels—exact duplicates—are set up in each plane. The operator, or "beeper," in the mother craft has a television picture of the drone's operations board. The panel is pictured as clearly on the small screen as if it were an actual photograph.

The beeper can see instantly the drone's gauges—altitude, speed, manifold pressure, compass, R.P.M. (revolutions per minute)—and fuel supply. The picture also carries the drone number, so that if more than one "babe" is involved, the "beeper" knows which craft's panel is pictured.

The drone is launched by a ground control crew, operating with radar equipment set up on two jeeps. As soon as it is airborne, control is taken over by the mother, which quickly puts it on the automatic pilot. Speed, altitude or other operational changes are effected by the beeper by electronics.

For landings, the mother directs the drone's approach in a normal landing circle. It drops the drone to 800 feet altitude, slows it to 135 miles an hour and turns it over to the ground control crew for the actual landing when the drone is a little less than a mile from the runway. The drone is braked to a normal stop by electronics control by the ground crew. Barring mishap, the drone lands as smoothly as a piloted craft.

A mother can control as many drones in flight as she can carry in individual operations panels.

Where Milk Is Dear

Price In United States Much Higher Than In Canada

In a flat comparing prices in Canada with those in the United States, it was stated that milk cost only 13 cents a quart in Toronto, as against 18 to 19 cents a quart in Buffalo. As the Times-Review of Port Erie points out, the difference is greater than that. The Canadian imperial quart is 40 fluid ounces, while the U.S. quart is only 32. So the minimum price of milk in Buffalo, on the basis of imperial measure, is actually 22½ cents a quart.

Sound Advice

Public Is Urged To Save Money For Future Use

The Bank of Montreal is putting across Canada a series of advertisements, directly addressed to the average individual earner. "Save yourself and you save Canada" is the substance of the timely admonition, which is stressed on five counts: Hold on to your Victory Bonds. Buy only those goods which are in fair supply and save your money for the day when goods now in short supply will be really available. Avoid black market purchases. Keep up your insurance. "Build up your savings account." "Save yourself and you save Canada" is not the counsel of despair. Nor is it one of futility. It is far better to have such advice now effective than to envisage the time when someone will cry out "Save you! quit", everybody for himself. The Bank of Montreal counsels thrift, frugality and a little care and foresight. Such counsel can never be out of date or obsolete. The uncertainties which may lie ahead will cause no fear for those who take the advice seriously.—St. Catharines Standard.

Talking Dog

Only Canine In The World Who Can Speak A Sentence

LONDON.—In the middle of the "dog days" the Daily Mirror was a talking dog on its readers which, the paper said, has been found to be the world's only canine who could articulate human speech. The Mirror told how two well known British veterinary surgeons had examined the phenomenon and had found that "Ben", boarded in Royton, near Cambridge, could say: "I want one." Just what "Ben" wanted remained obscure, although the dog performed his trick with particular success in a tavern, the Mirror said. Now, the veterinarians were said to advise that "Ben" should be taught to say: "I want more."

For Reducing Diets

Her hand touched his. Her eyes became mist-filled. "Hello," he said. "Hello," he heard her voice better. "Lots," he said. She could see it, too. "I was thinking," he said, rolling over onto one elbow. "You know that chicken farm idea we were talking about? You sure would use me on it. I'm going to take it home with me when I get out here." His expression changed slightly. "I... I'm sorry," he said. "I guess I did it. I tell you I got a girl back home. I... should have."

OUR COMPLETE SHORT STORY—

YOU KNOW BILL

— By —
MATTHEW F. CHRISTOPHER
Copyright
Wheeler Newspaper Syndicate

SHE heard the moon as she carried the empty glass out of the ward, and she knew it was the new boy in the corner. The one with the white bandages over his eyes. She saw the pain that grooved his forehead.

Suddenly she turned and went back into the ward. She stopped beside his bed, and her "Hello" was gentle, almost inaudible. "The doctor told me you'll be able to see," she said. "I'm happy to hear that." A wry smile came to his lips. "Yeah, I know," he said. "But one eye! I'd have to be twice as careful. I wouldn't be able to play ball. I couldn't focus with one eye. You can't focus with one eye. And people would stare at your back. There goes Joe Wais. Did you see his counterpane eye. I'd rather be—" His voice trailed off.

She sat down on the edge of the bed, and touched his arm above the elbow, resting her fingers lightly, with just enough pressure. She could understand because he was so young. Nineteen, Nurse West had said.

"You don't want to give up," she said. "It wasn't a routine. It sounded almost the same, but it wasn't. With each one it was different."

"Remember, there are some who lost both their eyes."

"I'm not them," he said. "And they don't like it. None of 'em like it."

"No, they don't," she agreed. "But they learn to take it, without giving up. They learn to live with their minds and their bodies and forget they ever had sight, and they're happy. But you'll be different. You will still be able to see."

"Leave," he begged. "Don't start giving me that again. I've heard it over and over, and I'm sick."

"I'm sorry," she said.

"I suppose that you don't care living in a cottage—"

"I'm not a lake, with the noises of birds and the rustle of leaves to keep you company?"

"She could feel him gazing at her from the corners of his hidden eyes. His mouth, a curved wound in his tawny skin, was smiling."

"I'm sorry," she sighed. "I guess you don't care for the outdoor sort of life."

"She felt unhappy, and she turned away from him, to fish in her pink fingerlings. "Perhaps you... well... never went fishing. Or hunting. Never."

"But I did," he said quickly. "I always fished. I loved it. And I loved hunting—" His voice caught.

"Oh, you did? How wonderful! I did, too. I used to fish with my brother. Did you ever fish for pickerel?"

"Picked? Sure, we used to go down to Perry Lake. Jim and I. Jim was a pal of mine, a great fisherman. We used to see who'd get the biggest. Boy! Pickerel! There was a lot of 'em in Perry Lake. But what I was crazy about was spearing for suckers. Did you ever spear for suckers?"

"Twice," she said. "But I don't care for it. I slipped on the rocks once and got soaked." "Oh, that's because you're a woman. Suckers are fun, more fun than fishin'. I got 83 one morning. I'll never forget it. Boy! A smile brightened his face, showing his white teeth.

"Will you... let me touch your hand?" he said. She smiled. She gave him her hand. He squeezed it. "You're swell," he said. "I can talk to you—all day." "I'll be seeing you again—soon," she said.

Nurse West met her in the corridor. "Carol," she said. "The doctors were telling me about Bill. Bill Delaney. Carol's forehead puckered in frown. "You know bill." Nurse West said. "The boy you were talking to yesterday, and the day before, and the day before that?"

"They say he's completely past the critical stage. They had almost given up hope for him. You must be a saint, darling," Carol laughed. "I'm so glad. He's a nice boy. I'll go and see him."

Bill was lying with his blind head on his hands when she came in. His eyes smiled warmly. "Hello," he said. "Hello, I heard you were better."

"Lots," he said. She could see it, too. "I was thinking," he said, rolling over onto one elbow. "You know that chicken farm idea we were talking about? You sure would use me on it. I'm going to take it home with me when I get out here." His expression changed slightly. "I... I'm sorry," he said. "I guess I did it. I tell you I got a girl back home. I... should have."

Her hand touched his. Her eyes became mist-filled. "Hello," he said. "Hello," he heard her voice better. "Lots," he said. She could see it, too. "I was thinking," he said, rolling over onto one elbow. "You know that chicken farm idea we were talking about? You sure would use me on it. I'm going to take it home with me when I get out here." His expression changed slightly. "I... I'm sorry," he said. "I guess I did it. I tell you I got a girl back home. I... should have."

"I'm sorry," he said. "I guess I did it. I tell you I got a girl back home. I... should have."

"I'm sorry," he said. "I guess I did it. I tell you I got a girl back home. I... should have."

"I'm sorry," he said. "I guess I did it. I tell you I got a girl back home. I... should have."

"I'm sorry," he said. "I guess I did it. I tell you I got a girl back home. I... should have."

"I'm sorry," he said. "I guess I did it. I tell you I got a girl back home. I... should have."

"I'm sorry," he said. "I guess I did it. I tell you I got a girl back home. I... should have."

"I'm sorry," he said. "I guess I did it. I tell you I got a girl back home. I... should have."

to live for. When they come here they forget everything but their wounds. They left their real lives behind them. I... I just bring it back to them."

Nurse West grinned. "Well, what I meant to say is, aren't you being unfair to yourself? He has another girl."

Carol smiled. "No, Miss West, that's where you're wrong. Really, the expense is always theirs. You see, I have another fellow, too. I always have another fellow."

Precious Cargo

Cosmic Rays Believed To Be Fostering Source Of Energy

Bearing a precious cargo of cosmic ray records, the specially equipped B-29 bomber which spearheaded science's latest attack on one of Nature's great riddles was flying to Washington.

The Superfort "Flying Laboratory," after a three months' pursuit of the strange cosmic messengers, which constantly bombard the earth from outer space, possibly held the key to many unsolved secrets of the universe.

Fitted with special instruments for measuring the intensity of the invisible radiations and recording their impact, the high-flying bomber ranged back and forth over a 4,800-mile path at heights up to approximately 6½ miles above sea level.

The area of research stretched from near the Canadian border to a spot off the coast of northern Chile. The little-understood cosmic rays from some secret source in space, are the most penetrating form of radiation. They pass through the human body 20 to 30 times a second. They have penetrated lead blocks 7½ feet thick. If man could harness their power he might have an endless source of titanic energy.

Likes Her Job

Woman Cobbler In Vancouver Would Not Do Anything Else

VANCOUVER.—Pretty Frances Chambers is a skilful cobbler and cannot understand why anyone should consider shoe-making an unusual occupation for women.

"I wouldn't change with any other occupation," she told an interviewer. "I like cobblering because it requires more talent than other occupations open to women and it enables me to meet so many people."

Mrs. Chambers started in the trade seven years ago and liked the work so well that she learned even to make the soles of the shoes. She said that she had never gauded her finger with an awl and has come to enjoy the arid odor of hot rubber.

Her husband, whom she said she "almost married over a mended boot," is also a cobbler.

Wide Size Range

4500 SIZES 34-50
This slip won't ride up, twist or bulge! Pattern 4500 takes full figure, little work... uses just three pattern parts. Clever side panels eliminate piecing. Pockets included. Pattern 4500 sizes 34, 36, 38, 40, 42, 44, 46, 48, 50. Size 36 slip, 2½ yds., 38-in. Embroidery transfer included.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this pattern. Write plainly Size, Name, Address and Style Number and send orders to the one Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg, Man.

Woman may still be inferior to man, but she can put a top on a jar without the help of all the tools in the house, a basin of hot water, and a vise.

Japanese Atrocities

Canada Securing Evidence To Assist In Prosecution

The R.C.A.F. has reported on the work of the Canadian war crimes liaison detachment which has been engaged for months tracing information on atrocities committed in Japanese prisoners of war camps against Canadian soldiers.

A press release said the unit, under command of Lt.-Col. Oscar Off of Vancouver and including three other officers, has been sifting evidence and comparing findings with those of Britain and the United States—evidence and findings which may eventually appear in war crimes courts at strategic points in the vast Pacific.

As Canada now has no armed force in the Far East, it will be necessary to try Japanese accused of crimes against Canadians in either British or Canadian courts. Both governments have informed Canada they are willing to try such criminals and have invited the detachment to assist in the prosecution.

In Ottawa the Canadian war crimes investigation section at defence headquarters, under Lt.-Col. M. Griffin of Vancouver, sorts and declassifies and adds the written testimony of former prisoners now back home in Canada.

One of the unit's most important pieces of evidence is the diary kept by Wing Cmdr. Leonard J. Birchall, O.B.E., D.F.C., of St. Catharines, the "Savior of Coyvon," who warned the British colony of the approach of a Japanese invasion fleet and then was shot down and taken prisoner.

The Canadians were pursuing the Japanese. Only one-half of the diary, made up of several flimsy paper scraps and kept hidden in a false-bottomed box, was recovered. The other half was lost in a bombardment by an American fleet.

The difficulties of the unit are many. There is ambiguity in evidence and the complexity of Japanese spelling makes identification difficult. Long distances have to be travelled to obtain testimony and check of evidence requires that affidavits be obtained from all parts of the world.

Made A Difference

Comma Dropped When Gray's Elegy Was Printed Change Meaning

It is strange that Thomas Gray's solemn Elegy Written in a Country Churchyard should begin with the jingling "The curfew tolls the knell of parting day."

As a matter of fact, most of us may recall occasions when we have others have jingled through it, quite satirically. But that important opening line of the great elegy would not have been inconspicuously jingled through 200 years if an anonymous proofreader in 1750 had not missed the comma which appeared in Gray's copy and which was soon dropped in the process of printing. If one re-reads the line with the comma in its proper place, one sees at once the literary injustice inflicted by the casual and distant error.

The curfew tolls the knell of parting day.

The significant pause banishes the jingling metre and restores the impressive solemnity at the poem's outset.—Montreal Gazette.

Car Production

Industry Is Seriously Hampered By Lack Of Parts

DETROIT.—Full volume passenger car production still is beyond the automobile industry's horizon, according to most of the authoritative surveys.

The industry, its spokesmen assert, is hampered by interruptions to the flow of parts, equipment and raw materials. "The car makers attribute these interruptions to strikes in supplier plants; representatives of the United Automobile Workers (CIO) Union charge that manufacturers are hoarding certain types of supplies against their competitors' unbalancing the over-all supply of car components."

Whatever the cause of the production lag the industry has turned out about 1,500,000 fewer passenger cars than it hoped to assemble up to this time.

At the age of 11, Goethe wrote a novel in seven languages.

Cattle Shipments

Exports From Canada During Last Year Were Heavy

More than 71,000 head of purebred dairy cattle, having an aggregate value of \$11,012,955, were exported by Canada to 23 countries during 1945, the Department of Trade and Commerce has announced.

Of these 24,071, valued at \$5,161,361, were classed as purebred cattle, while 47,304, valued at \$6,451,594, were dairy cattle.

An additional 9,801 purebred cattle and 24,847 dairy cattle were exported during the first five months of the current calendar year.

These figures indicate the rapidity with which Canada has risen to prominence as a producer of breeding stock as in 1930 only 3,017 purebred cattle valued at \$602,889 were exported. Shipments of dairy cattle to other countries fifteen years ago totalled only 9,257, valued at \$390,687.

A total of 3,470 purebred sheep, valued at \$93,163 were also exported in 1945 as were 852 purebred swine, valued at \$33,530; 26,650 purebred poultry, valued at \$61,872; and 848,880 baby chicks, valued at \$115,218.

Canadian Foundation

Is To Be Established For The Advancement Of Pharmacy

The Canadian Conference of Pharmaceutical Faculties meeting in Toronto in conjunction with the annual council meeting of the Canadian Pharmaceutical Association, announced the establishment of a Canadian foundation for the advancement of pharmacy which will provide funds for student scholarships, fellowships for graduate students in pharmacy and refresher courses for graduate students.

The foundation, headed by J. R. Kennedy of Toronto, was established by drug manufacturers, distributors and retailers throughout Canada.

SELECTED RECIPES

LEISURELY WEEK-ENDING

Are you a slave to week-end? Do you stay in the kitchen while your husband and the children are off to the golf course, the playground or a hike? Careful planning can put you on a five-day working week.

A Saturday night standby, baked beans, fills the bill for a quick and easy meal. Serve them with brown bread and a green salad, and you have a nourishing meal ready for the table in practically no time at all.

Two meals on Sunday can easily do duty for three on week days. If the members of your family are late risers the corn flakes will be clamoring for a substantial breakfast. Make it "brunch" and forget about lunch-on-altogether. Try these menus as a starter on the road to happy week-endings!

Saturday Night Supper

Baked Beans
Mixed Greens
Bran Bread Butter
Fresh Fruit
Beverage

Sunday "Brunch"

Corn Flakes
Fresh Berries with Cream
Scrambled Eggs
Bacon Strips and Sausages
Toast

Sunday Dinner

Minted Pineapple Juice
Upside-Down Ham Loaf*
Buttered Asparagus
Potatoes Paprika
Spring Salad
Rolls
Butter
Ice Cream with Chocolate Sauce
Cookies Beverage

UPSIDE-DOWN HAM LOAF*

2 lbs. ground smoked raw ham
2 eggs
1 cup milk
½ teaspoon salt
2 tsp. chopped green pepper
2 cups corn flakes
½ cup brown sugar
teaspoon whole cloves
Combine meat with eggs, milk, salt and green pepper; mix well. Add coarsely crushed corn flakes and mix thoroughly. Sprinkle brown sugar in bottom of loaf pan. Sprinkle with cloves. Add mixture. Bake in moderate oven (350 deg. F.) about 1½ hours. Unmold and turn upside-down on heated platter. Yield: Eight servings.

SENATOR TO SAVE MINNE-HA-HA'S SKIN

Organization of a society for the preservation of the cigar store Indian in Maryland is planned by Senator George I. Radcliffe, who poses with a wooden statue of Minne-Ha-Ha, now stored in the Maryland Historical society's museum at Baltimore.

Natural Resources

Of Ontario Said To Be Retarded By Lack Of Population

TORONTO.—Development of Ontario's vast natural resources is retarded only by lack of population, provincial agriculture minister Kennedy said at a dinner given by the government for the international emergency good council committee on fertilizers. The committee represents 11 nations.

"Our population is only 11 persons to the square mile and the land under cultivation amounts to only 45 per cent. of the province's area," said Mr. Kennedy. "What we need here is more people."

More than a score of pulp and paper companies in Northern Ontario were in constant operation but they had only scratched the fringe of millions of acres of standing timber.

"One company (Abitibi) is working in a circle which will take it 20 years to complete and by the time there will be new growth ready for cutting," said Mr. Kennedy. "I've flown over areas which I doubt will ever see the imprint of man for years to come."

TROOPS OVERSEAS

More than 9,400 army, navy and air force personnel are still overseas awaiting repatriation to Canada, it was learned from service headquarters. A total of 8,700 soldiers, 700 airmen comprise the group. Number of naval personnel overseas will not be known until enlistments in the new interim force are complete.

Local and General Items

It's no use wanting a change unless you want to change.

Rev. and Mrs. A. Larke, of Magrath, visited Blairmore last week end.

Some people slip their brains into neutral and let their tongues idle on.

Mr. and Mrs. Lew Williams are visiting friends and relatives in Stettler.

Mrs. Lawrence Picard of Vancouver is visiting relatives in Blairmore and Coleman.

Mr. and Mrs. Dillon, of California, are visiting Mrs. Dillon's parents, Mr. and Mrs. W. Pearson.

Mr. and Mrs. G. Costellan and sons, Leonard and David, leave tonight to vacation at the coast.

Nurse Vojni, of the local hospital staff, has returned to her duties after an absence of six weeks.

Joyce Millett, Caroline Curcio and Ann Kanik are included on the local teaching staff this year.

Overheard on the elevator: "I'm sure it's love. He gives her coupons." North Bay Daily Record.

Mr. Henry Gebro was a visitor in Blairmore this week. He is looking well despite his 81 years.

Miss Natalie Minunzie left on Tuesday for Toronto where she will enter the Toronto Conservatory of Music.

Rev. W. Graziar, following an enforced rest, will conduct service at St. Luke's church Sunday evening next.

F. J. MacKinnon of Vancouver is visiting his son, C. F. MacKinnon, and Mrs. MacKinnon, of the Variety Shop.

The battle for world peace is not a matter of taking sides about world problems but of taking leadership in solving them.

Dr. R. Burgman has purchased Mrs. W. J. Bartlett's house and will move his family into their new home this week.

Mr. and Mrs. Alfred McKay and daughter, Norma Jean, will spend their vacation in Creston and Grey Creek, B.C.

Roy Upham recently received his release from the RCAF and is visiting at his home here with his parents, Mr. and Mrs. H. D. Upham.

Mr. and Mrs. E. O. Duke, of Hillcrest, were recent week end visitors at Fernie where they were the guests of their son and daughter-in-law, Mr. and Mrs. Horace Duke.

Mr. and Mrs. Peter Farmer and young son, Peter, will leave for Edmonton this week where they will visit Dr. and Mrs. P. Malcolmson, later returning to their home in Port Hope, Ontario.

Rev. Robt. Magowan, DD, of Coleman, will occupy the pulpit of Central United church, while the pastor, Rev. McKelvey is on vacation. You are cordially invited to be present at this service Sunday evening at 7.30.

On Thursday evening at the home of Mr. and Mrs. J. J. Murray the United church Ladies Aid entertained in honor of a former member Mrs. M. May and presented her with a farewell gift. Mrs. May is leaving for Wenatchee, Wash. where she will teach school for the next year.

Mr. and Mrs. John Patricia and family of Bellevue were overnight guests at the home of Mrs. Olive West on Saturday and on Sunday they were dinner guests of Mr. and Mrs. Irvin Tolley. They brought Lindahl Tolley home from Blairmore. She spent a week of her holidays there with her aunt, Mrs. Glenn Bateman. Mountain View note in Cardston News.

Ridy Sardesh, of Hillcrest, was a recent visitor to Kimberley.

"We talk about reconstruction in the world. The real job is re-creation."

Mrs. Roland Maniquet left last week to join her husband at Dawson Creek.

OVER 4,000 VOLUNTEERS TO AID IN RATION BOOK DISTRIBUTION IN SEPTEMBER

More than six thousand volunteer workers to help distribute Ration Book No. 5 during the week of September 9-15 will be needed by local ration boards in Alberta, it was estimated today by Wartime Prices and Trade Board officials.

There are fifty-three local ration boards in Alberta and they will collectively handle more than 900,000 ration books during distribution week. "It is an enormous task to be accomplished within a short period of time," the prices board official observed, "and for reasons of both economy and speed we have to depend on the help of the volunteers as we did during the war years."

While practically all volunteers who served in former years have again offered their services, there are many opportunities for newcomers to help in this important work. Those who wish to help should offer their services to the nearest local ration board as soon as possible, so that all plans can be completed and everything made ready before the distribution begins on Monday, September 9.
